Tnx fer QSO on **29 October 2015** At **00:03** UTC

Freq **7.310** Mhz Mode **CW** Ur RST **559**

My Rig FT450d My Output power was 100watts

My Antenna Dipole about 10mtrs above ground

Mny Tnx es hpe to cuagn sn 73 es gud DX *John*

Thanks for the QSO and very nice to work you. I am 64 years old and been a ham for about 40 years and was a SWL from being about 8 years old. I worked as a paramedic though I am now retired. I operate CW nearly all the time and only use straight keys, either an old Czech army key or an old Kent brass pounder. I enjoy both DXing and having a chat on the key so please feel free to call me again for a chat. My web site **www.bartonuponhumber.org.uk** contains information about the town where I live and grew up which looks out over the bridge on the front of this card. God Bless you and your family and hope to work you again soon

TKS QSO ART. YOUR CQ WAS FIRST BUT IT WAS A PLEASURE TO BE YOUR FIRST DX CONTACT. KEEP UP THE GOOD WORK AND THE KEY. GODS BLESS
